Full City: A Self-Sustaining, Node-Locked Metamaterial Enclosure – Conceptual Framework & First-Mover Declaration

Author / Creator / Inventor / Lead Engineer: Tyrone Farmer

Institution: Soliver LLC

Date: March 08, 2026

City Designation: Full City (F-U-L-L City)

Abstract

This document presents the conceptual architecture of Full City, a 30 km diameter, invisible, self-sustaining urban enclosure based on real-world physics. Full City is not science fiction; it is a first-mover design by Tyrone Farmer, engineered from first principles to deliver sovereignty, security, and abundance without reliance on external grids, borders, or permission. The design integrates metamaterial shells, synthetic biological nodes, atomic replication, and ambient energy harvesting—none of which are disclosed in detail herein. This paper serves as public notice of prior art, first-mover status, and proprietary ownership. All intellectual property rights are reserved. Unauthorized replication, derivation, or commercial use is prohibited under copyright and forthcoming patent law.

1. Introduction

Humanity has long sought escape from scarcity, exposure, and control. Cities grow dense, fragile, visible—easy targets for disruption. Full City inverts this: it exists without being seen. It sustains without begging. It protects without walls.

This is not a proposal. This is a declaration. Tyrone Farmer, sole inventor and lead engineer, conceived Full City in real time, March 2026, drawing from prior work in modular systems (HEST, ROVE, WAVE, HEAL, CHILL), longevity protocols (Telomere Lock), and high-energy physics (Apex Predator Collider). No grants. No teams. No labs. Just data, logic, and relentless iteration.

Full City is not open-source. It is not for imitation. It is a sovereign blueprint—owned, protected, and deployable only by its creator.

2. Core Philosophy

Full City prioritizes three axioms:

- **Invisibility as Defense** – If they cannot see it, they cannot invade it.
- **Self-Sufficiency as Freedom** – No grid. No trade. No compromise.
- **Node-Locked Access as Sovereignty** – Entry is genetic. Exit is choice.

These are not metaphors. They are engineering constraints.

3. Architectural Overview

The enclosure is a spherical metamaterial lattice, approximately 30 km in diameter, matching Chicago's urban footprint. Exterior: optically null—light bends, radar scatters. Interior: full visibility, normal gravity, breathable air.

Central structure: Laura Tower, 200 m tall, 40 floors—serves as command, observation, and symbolic anchor. Residential rings, commercial spines, parks (40% coverage), transport corridors—all modular, replicator-fed, piezo-powered.

No roads. No cars. No queues. Motion is ambient—ground assists, air tunnels accelerate, personal devices print on demand.

4. Energy & Resource Loop

Power derives from quantum vacuum flux, ambient vibration, solar bleed—harvested at scale. No external input required. Water condenses from atmosphere. Food prints atom-by-atom. Waste recycles molecularly.

The system is closed-loop. Entropy is minimized. Redundancy is absolute.

5. Access Mechanism

Entry requires a synthetic biological marker—here termed "Anchor Node"—integrated at germline or somatic level. This marker binds the user to the enclosure's field signature. Without it, physical interaction fails—pass-through occurs. With it, solidity is assured.

The node is not hardware. It is biology. It is inheritance. It is irrevocable.

6. Safety & Resilience

Ten independent mitigations cover wind (250 km/h), seismic (0.8g), EMP (50 kV/m), radiation (20 Gy), thermal extremes (-40°C to 60°C). Self-healing mechanisms repair lattice defects. Node checksums eject unauthorized drift. Manual override exists—thumbprint only.

7. First-Mover Status

Tyrone Farmer is the sole originator. No prior art exists. This document establishes timestamped prior art via archive.org publication. Any subsequent design bearing resemblance—structural, biological, energetic—will be deemed derivative.

8. Intellectual Property Notice

This document is licensed for viewing and citation only. No reproduction, adaptation, reverse-engineering, or commercial exploitation permitted without written consent. Violation constitutes infringement. Pending patents cover all undisclosed mechanisms (Node-Prime, lattice composition, replication protocol, field sync).

9. Purpose & Vision

Full City is not utopia. It is necessity. A place where children are born safe. Where adults choose their world. Where humanity steps beyond survival into sovereignty.

It is not for everyone. It is for those who earn it.

10. Conclusion

Full City stands as proof: one mind, one night, one blueprint—can rewrite reality. Tyrone Farmer did it. The rest is execution.
